Industry	0	0	1	1	0	0	2	1
Other	7	0	1	1	0	2	11	11

User Definition:

Any individual who makes use of the facility as part of an active User proposal in the EMSL Usage System is considered an EMSL user.

For each fiscal year, each user will be categorized as a/an:

- a) onsite user -- individuals who are physically present at EMSL, at least once during the reporting period, to conduct their research.
- b) remote user -- individuals who remotely access EMSL by logging onto EMSL's network to operate a piece of research instrumentation, or by sending or receiving samples.

User Counts:

*Users are counted once per fiscal year, and do not include EMSL staff.

**Proposals are counted only once according to proposal type. Users with multiple proposal types will be shown once per each proposal type. EMSL staff proposals (Intramural and Staff Time) are not included in proposal counts. CIR user activity recorded is due to the final Chinook job completing after 9/30.
